GLOBAL CONSORTIUM ON
CLIMATE AND HEALTH EDUCATION

Dear colleague,

The health sector has the responsibility to address the health impacts of climate change and the Global Consortium on Climate and Health Education has shown leadership to meeting that responsibility, including through the participation in the [National Academy of Medicine's Climate Collaborative](#). We have been proud to represent members like you, to do this [foundational work](#). Recently, the [NAM Climate Collaborative has launched a National Movement](#) to mobilize all health sector organizations to join directly and participate. With this note, Dr. Dzau, NAM President, and I are excited to invite you to join directly the NAM's new initiative to accelerate the national climate and health movement.

[Join us in accelerating the climate and health movement >>](#)

There are no specific obligations by joining. Those who sign up will have the opportunity to access learnings from leading organizations in climate and health, forge new and exciting collaborations, and help make collective progress and showcase the landscape of actors and actions. **Sign up by August 30, 2024**, to be part of an announcement at the Climate Collaborative's Fall public event. The NAM looks forward to amplifying the important work already underway and to come on your sustainability journey.

Together, we will build and sustain this movement's momentum to better support the health of patients and communities!

Sincerely,

Cecilia Sorensen, MD
Director
Global Consortium on Climate and Health Education

&

Victor J. Dzau, MD
President
National Academy of Medicine
