

IT'S GAME ON

The **Academy of Science of South Africa**, in partnership with the **African Wildlife Economy Institute**, cordially invite you to a webinar on:

Game meat: A game changer for climate resilience and food security?

Date: 10 March 2026

Time: 10:00–11:30 (SAST)

Venue: Zoom

Register: [Here](#)

BACKGROUND

As climate change challenges conventional agriculture, game meat offers innovative solutions for food security, livelihoods, and ecosystem conservation, particularly in climate-vulnerable regions.

In response to the ongoing climate-induced challenges and the need for evidence-informed solutions, ASSAf, through its Forum on Integrated Climate Change, and AWEI, are launching a webinar series to explore the untapped potential of game meat in building climate-resilient and sustainable food systems.

This inaugural webinar will set the scene and lay the groundwork for deeper engagement in future sessions, featuring insights from leading scholars and experts in the field.

SPEAKERS

Mr Kent Buchanon
Stellenbosch University

With over ten years experience working in national government on policy development, Kent is now pursuing a PhD in climate smart agriculture at Stellenbosch University.

Dr Thabang Teffo
Southern African Wildlife College

Thabang heads the Nature-based Economy & Community-led Conservation Units at the SAWC and has a keen interest in responsible resource use, management and nature-based economics.
